”Archipress M is internationally leading in designing and writing books about Nordic architecture, that are focused and spread on the market.”

Archipress M is a publishing company founded by Marianne Ibler, arch.phd. The publishing program is specialized in Nordic architecture and design and focuses on new works of established and emerging architects and designers.

By focusing on historical and critical reflection of the contemporary architecture Archipress M produces informative and inspirational books. The books include texts written by acknowledged international architects such as Kenneth Frampton, Steven Holl, Walter Hood and Robert McCarter. The books are sold and distributed in book shops and museum shops around the world. Archipress M's books are written in English and Danish language and produced as beautiful and presentable coffee table books. Easily accessible for all readers with even the slightest interest in Nordic new architecture and design.

## News in Nordic Architecture Nyheder i Nordisk Arkitektur

### Textures + Materials

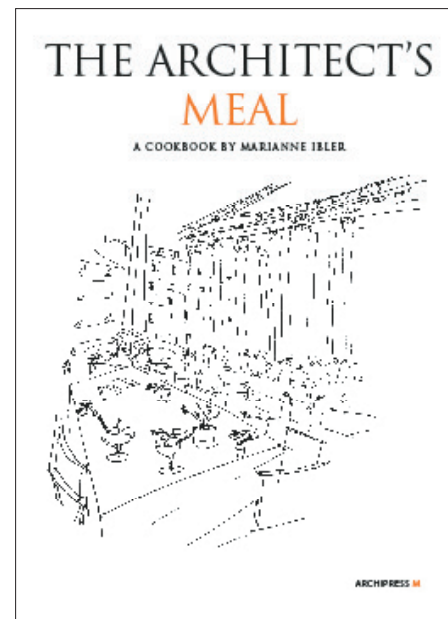

The book introduces a wide range of the latest architecture and building transformations with focus on the use of facades and claddings. It features a rich palette of illustrations and photographs and is a compilation of the latest architecture.

This, also with a thoughtful and historical essay on the development of facades and architecture written by the Architect Anna Maria Indrio, partner in the new Danish company Norrøn Architects and former partner in C.F. Møller Architects.

In the book new buildings and projects made by 18 well known Nordic architectural studios are featured as well as it contains interesting interviews with each architectural studio about their specific way of working with architecture.

## The Architect's Meal (UK VER.) Arkitektens Måltid (DK VER.)

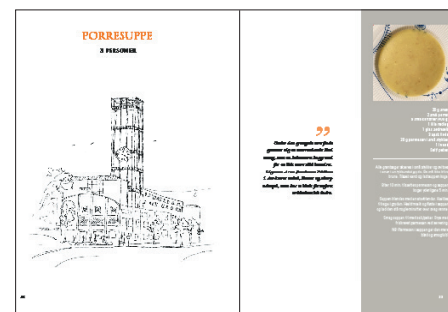

### A cookbook by Marianne Ibler

*The Architect's Meal* is an aesthetically sensual cookbook filled with wanderlust, where Marianne Ibler unites her passion for international architecture with food and Nordic traditions.

The book shows how colours, forms, places and memories inspire for everyday dishes.

This is a completely new kind of cookbook with a strong appeal to the senses. There are many correlations between cooking and architecture.

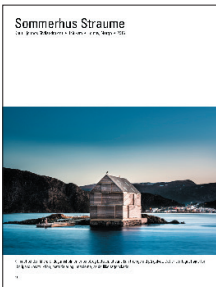

The book has up to 100 drawings made by the Marianne Ibler.

# Cool nordiske boliger

>> Selected Projects

## Cool nordiske boliger

A colourful and inspiring book showing new Nordic housing designed with a myriad of varieties of wood, glass and tiles. It is materials that form an important part of Nordic building tradition and which engender in Nordic geographic contexts. The book is based on selected projects from the book series: *News in Nordic Architecture*, *A New Golden Age* and *Global Danish Architecture*. Beautiful photos and easy to read texts makes this book very appealing and joyful.

Holiday homes, bigger or smaller villas, row houses or larger residential buildings. This book is addressed to anyone interested in Nordic architecture and new housing projects.

This book is without theory, complicated texts or technical details but made exclusively with beautiful photos with explanatory texts. It gives appetite for architecture.

## News in Nordic Architecture Nyheder i Nordisk Arkitektur

Introduces a wide range of new Nordic buildings by 32 Nordic architects. It addresses a wide audience with the latest news within architecture.

News in Nordic Architecture includes an essay by Kjetil Trædal Thorsen, the founder of the world famous studio Snøhetta.

What can be considered Nordic in architecture? Find the answer in Kjetil Trædal Thorsen's starring essay. It argues for many of the elements that can be considered to be the essence of Nordic thinking.

## A New Golden Age 2nd edition

### Nordic Housing

This third book in the series *A New Golden Age* presents several different kinds of new housing projects, varying from a tiny wooden annex dwelling to notable one-family houses and huge housing complexes made by Nordic architects.

Shows a colourful palette dominated by bricks, concrete and diverse cladding, textures and colours.

Includes an in-depth and exclusive interview with Bjarke Ingels, BIG.

Included is also an essay by the acknowledged American architect and writer John M. Cava, who states that Nordic architects today are collectively producing the most creative and enduring architecture in the developed world.

## A New Golden Age

### Architecture & Landscape

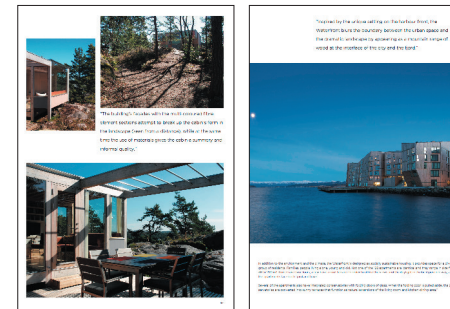

A kaleidoscopic survey of brand new Nordic architecture and surrounding landscapes, characterized by Nordic light, the vast blue sea, white winters, green nature and urban spaces.

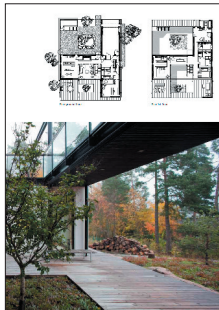

Read about views on landscape. The famous US based landscape architect Walter J. Hood writes in the book. Francesco Ranocchi and Kim Dirckinck-Holmfeld writes about architecture today.

Nordic architects in Scandinavia are good at adapting and forming creative correlations between architecture and surroundings.

The differences in the landscapes in the countries presented in this book create very different settings for architecture and therefore different solutions on how to incorporate the architecture in the landscape and the landscape in the architecture.

## Global Danish Architecture #7

### SEVEN

*Global Danish Architecture #7* provides an outline of the overall development that Danish architecture has undergone since the first issue of the series *Global Danish Architecture, GD #1* started in 2006.

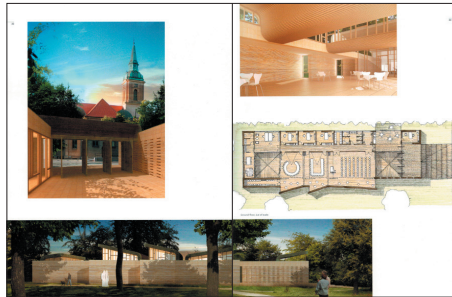

The book deals with innovation, the Danish housing boom, sustainability, traditions and social responsibility. Included are essays about architectural sustainability and redevelopment of existing architecture by architects Signe Kongebro and Peder Elgaard.

A guide for the creation of new architecture and comments to some of the problems, needs and paradigms that are currently facing the architectural profession in many places across the world. This includes sustainability and conversion as well as adapting to existing buildings.

The projects in the book are created by a number of successful Danish architectural studios that together provides a wide image of Danish innovation.

## Global Danish Architecture #6

Living & Working

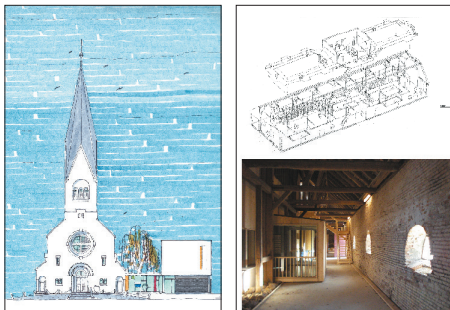

The bookazine *Living & Working* showcases several buildings with working spaces or office buildings as well as it shows different kinds of housing and living spaces.

The living section presents houses, including villas, flats, holiday homes and small houses for artists. The working section includes office buildings for different occupational groups and public institutions.

The idea is to illustrate creative diversity within the framework that defines everyday private life and professional life in Denmark and abroad.

Included is an interview with the head of Aarhus School of Architecture, Torben Nielsen. Included are also essays by architect and former director of AIA NY, Rick Bell and by the US-professor Robert McCarter.

## Global Danish Architecture #5

### 30 New Projects

The bookazine addresses the five keys to interpreting contemporary architecture; Learning, Education, Playing, Caring and Dwelling.

The 30 projects chosen provide an understanding of how a contemporary social and functional intention is expressed within modern architecture.

The book highlights the importance of a social human-oriented architectural design focus throughout various building typologies ranging from public buildings and schools to social housing projects.

## Kay Fisker and The Danish Academy in Rome

The first and absolutely Must-Have book about the Danish Academy in Rome.

It presents and analyses the building which houses the Danish Academy in Rome that was created by the famous Danish architect Kay Fisker in the 1960s.

The Danish Academy in Rome was the last work of the Danish architect Kay Fisker and is as such an even more important and a fine example of modern architecture.

Kay Fisker is known for being one of the architects bridging a new time and he knew how to transfer the cubist design ideals of international functionalism into simple brick buildings. The book demonstrates in depth the architecture of the building, its history and the design phase by texts, original drawings and beautiful photos made by the famous photographer, Jens Lindhe.
